

CAST PHARMA is a leading medical training agency that uses the concept of VISUAL STORYTELLING to create high-quality medical training and learning tools for pharmaceutical and biotech companies worldwide.

To start as soon as possible in our office in Dresden, we are seeking an experienced

Medical Content Development Specialist

Your responsibilities:

- researching in various scientific studies, papers, and publications
- preparing and compiling research results and coordinating with the design team
- developing ideas in cooperation with project managers and graphic designers
- creating both rough and detailed concepts for all types of training/learning applications
- developing image ideas and scientific texts
- in close collaboration with project management, using design and technology to aid project implementation throughout the project period

Your qualifications:

- PhD in biology or biochemistry
- strong skills in storytelling for training/learning applications
- at least three years of experience in an agency, preferably in the field of training/learning
- creativity, a developed aesthetic sense, and experience with digital media
- the ability to take responsibility and initiative
- excellent skills in both external and internal communication (visual, verbal, and written)
- fluent business English

We offer:

- exciting assignments and independent work in a growing enterprise
- a positive working atmosphere in a friendly environment
- flat hierarchies and a minimum of red tape
- competitive pay

To apply, please email us your resume and earliest start date. We look forward to meeting you!
